Sir:

In response to the Office Action dated May 24, 2002, Applicant respectfully requests consideration of the following remarks.

## REMARKS

The Office Action mailed May 24, 2002 has been carefully reviewed and the following remarks have been made in consequence thereof.

Claims 1-28 are now pending in this application. Claims 1-28 stand rejected.

The objections to the drawings under 37 CFR 1.83(a) are respectfully traversed. Applicant submits that under 37 C.F.R. 1.83(a), conventional features disclosed in the Description and Claims need not be shown in the drawings where their detailed illustration is not essential for a proper understanding of the invention. It is believed that the details recited within the present Claims are illustrated in sufficient detail as to be readily appreciated by those in the art to make and practice the invention. Specifically, Figures 1 and 2 and the accompanying specification describe different exemplary embodiments of the components, and as such, Applicant respectfully submits that additional or amended drawings are not necessary for a complete understanding of the subject matter sought to be patented. For at least the reasons set forth above, Applicant requests that the objections to the drawings be withdrawn.
